## TILE : RESOURCES & MAINTENANCE TIPS

### Bullnosing Services

Many customers want to use bullnose to complete their kitchen or bathroom projects, but not all tiles or stone offer a bullnose option. The Hamilton Parker Company offers a bullnosing service for your convenience. For a small fee per lineal foot, we bullnose edges up to two feet in length and up to 13 inches in width, including unglazed porcelain and any type of natural stone. The bullnose edge will have a matte finish when complete. We can also bullnose clay body tiles or glazed porcelain tiles. The edge on these products would have to be painted with acrylic paint to hide the body of the tile. Lead time is 1-2 weeks for anything less than 100 lineal feet. There is an up charge per lineal foot for any tiles that need to be cut down to meet the maximum width of 13 inches.
